

SHIPPING CONTAINER ROTATING ROOF AIR VENT (WHIRLYBIRD)

MAINTENANCETIPS

REGULAR MAINTENANCE IS IMPORTANT TO KEEP YOUR WHIRLYBIRD WORKING PROPERLY AND LASTING LONGER.

1. CLEAN REGULARLY

- REMOVE DEBRIS: CHECK THE VENT OFTEN FOR DIRT, LEAVES, OR OTHER DEBRIS THAT MIGHT BLOCK THE AIRFLOW. USE A SOFT BRUSH OR CLOTH TO CLEAN THE VENT AND SURROUNDING AREA.
- CLEAR THE ROOF: MAKE SURE THE ROOF AROUND THE VENT IS FREE OF DEBRIS LIKE LEAVES OR DIRT, WHICH COULD IMPACT AIRFLOW.

2. CHECK FOR BLOCKAGES

- INSPECT THE BLADES: MAKE SURE NOTHING IS BLOCKING THE BLADES OR AIRFLOW. CHECK THE INSIDE OF THE VENT AND REMOVE ANY OBJECTS THAT MIGHT STOP IT FROM ROTATING.
- SPIN THE VENT: HAND-SPIN THE VENT TO CHECK THAT IT MOVES SMOOTHLY. IF IT FEELS STIFF, THERE MIGHT BE AN OBSTRUCTION INSIDE.

3. LUBRICATE THE MOVING PARTS

- APPLY LUBRICANT: USE A LIGHT LUBRICANT ON THE MOVING PARTS, LIKE THE CENTRAL AXIS AND BEARINGS, TO KEEP EVERYTHING SPINNING SMOOTHLY.
- DON'T OVERDO IT: BE CAREFUL NOT TO USE TOO MUCH LUBRICANT, AS IT CAN ATTRACT DIRT AND CAUSE PROBLEMS.

4. LOOK FOR DAMAGE

- INSPECT FOR WEAR: CHECK THE BLADES AND HOUSING FOR ANY CRACKS, RUST, OR OTHER SIGNS OF DAMAGE. REPLACE THE PART TO KEEP THE VENT WORKING WELL IF YOU FIND ANY.
- CHECK SEALS: ENSURE THE VENT IS SECURELY ATTACHED TO THE ROOF AND THAT THE SEALS AROUND IT ARE INTACT TO PREVENT LEAKS.

5. MONITOR VENT PERFORMANCE

- CHECK AIRFLOW: ON WINDY DAYS, SEE IF THE WHIRLYBIRD IS SPINNING AND DRAWING OUT HOT AIR. IF IT'S NOT WORKING WELL, THERE COULD BE AN OBSTRUCTION OR PROBLEM.
- LOOK FOR MOISTURE: WATCH THE INSIDE OF THE CONTAINER FOR ANY SIGNS OF MOISTURE BUILDUP OR MOLD. A WORKING VENT SHOULD KEEP IT DRY.

6. INSPECT AFTER STORMS

- BEFORE STORMS: BEFORE HEAVY RAIN OR STORMS, CHECK THAT THE VENT IS SECURE AND NO DEBRIS INSIDE IT.
- AFTER STORMS: AFTER BAD WEATHER, CHECK THE VENT TO ENSURE IT'S STILL WORKING AND HASN'T BEEN DAMAGED.

7. ANNUAL CHECK

• GET A PROFESSIONAL INSPECTION: HAVE A PROFESSIONAL CHECK YOUR WHIRLYBIRD ONCE A YEAR TO CATCH ANY PROBLEMS EARLY.

By following these simple tips, your rotating roof air vent will keep your container cool, dry, and in great condition. Regular maintenance ensures it stays energy-efficient and works well for a long time.
